DATE MAILED: 08/31/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/761,797	Applicant(s) LAXSON, EDSEL F.	
	Examiner Christopher M. Koehler	Art Unit 3726	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
2. On page 2, line 4 change "attached" to --attach--.
3. On page 4, line 7 it is unclear whether applicant intends element 17 to be called a "handle end" or if applicant intends 17 to be a "rod end" or "handle end of rod" since element 17 is a portion of the rod and not a portion of the handle as depicted in figure 1.

Appropriate correction is required.

Drawings

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings appear to be drawn and labeled by hand, and would not be sufficient for printing should the application issue as a patent. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Objections

5. Claim 1 is objected to because of the following informalities: Applicant refers to both a "tie-wire member" and a "tie wire member". Applicant is requested to either hyphenate all or none of the appearances of the term "tie wire" to maintain conformity in the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 102

Art Unit: 3726

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ferguson (US Patent No. 5,518,044).

8. Ferguson teaches a method of attaching barbed wire to a fence post comprising the steps of juxtaposing a length of barbed wire with a fence post (figure 4), engaging a tie-wire member (32) with the fence post (48) and juxtaposing first and second terminal ends of the tie wire member (28 and 30) with the length of barbed wire (46) on first and second sides of the fence post, selecting a tie wire attachment apparatus (20, figure 1) comprising a handle (22) and a receiver rod (24) extending from the handle, the receiver rod having a recess (26) formed at a distal end thereof, inserting the first terminal segment of the tie wire member into the recess of the receiver rod (figure 5), manipulating the tie wire attachment apparatus while engaged with the first terminal segment of the tie wire member to encircle the barbed wire segment with the first terminal segment of the tie wire member on the first side of the fence post, removing the tie wire attachment apparatus from the first terminal segment of the tie wire member, inserting the second terminal segment of the tie wire member into the recess of the receiver rod, manipulating the tie wire attachment apparatus while engaged with the second terminal segment of the tie wire member to encircle the barbed wire segment with the second terminal segment of the tie wire member on the second side of the

fence post, removing the tie wire attachment apparatus from the second terminal segment of the tie wire member.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
